Projects

GitHub profile: <https://github.com/ayeshijayarathna>

- Software Development Project C#
Associated with NSBM Green University - Sri Lanka

We created Car service Management System as a group project using C#. So we created main sections as a team, such as, login page-Dashboard-Booking appointment-Customer data-Vehical details-Service History-Expenses Details-Employee details-Inventory data-Statistics. Among this sections, Customer data was created by me.

- Software Development Project C#
Associated with IMBS Green Campus - Sri Lanka

This is my first complete software development project using C# for a library management system called Sarasavi. And also I created main 8 sections, such as book registration, book details, User registration, User details, Issue book, Return book, complete details and Inquiries.

- Web development project
Associated with NSBM Green University- Sri Lanka

We created a website called Jewel-Aura as a group project and it was a great help web development experience and improving skills for us. The main purpose of our website is gold buying and selling. Among the web pages I contributed for about us and Terms and Conditions pages.

Extra-Curricular Activities And Achievements

- 1st place, All Island Art competition.
- Participated All Island Art Competitions.
- 1st place, Poster Design, Provincial Media Competition.
- Participated gymnastic, Chess competitions.
- Holding the positions of class leader and prefect in Vishakha Girls College, Kuliyaipitiya. And participated leadership training sessions.
